

Build Green With Reward

Whether you need to meet your clients' demands for an environmentally friendly structure or simply would like to use "green" building as a competitive advantage in your marketplace, Reward Wall Systems is your solution for sustainable design and construction.

Good For Your Business

When you build green with Reward, you also gain advantages in your business that allow you to:

- Complete structures more quickly and with smaller crews.
- Produce less construction waste, having scraps that are 100 percent recyclable.
- Create structures that last longer and require less maintenance.
- Offer clients greater choice, setting you apart from other builders.

Good For The Owner

When you build with Reward, you'll find that the qualities that make your building "green" also make it more comfortable and cost-effective to own, such as:

- Reducing heating and cooling costs by 50% to 80%, as well as the fuels required to produce energy.
- Creating a virtually soundproof environment and a barrier to outside allergens.
- Enhancing indoor air quality and maintaining more even temperatures.
- Improving safety with the ability to withstand 200 mph wind gusts, endure fire for up to 4 hours and offer an "excellent" seismic rating.

Good For The Environment

What's more, the materials in Reward ICFs are friendly to the environment, having no ozone-damaging CFCs or HCFCs generated during the manufacturing process and no formaldehyde present in the forms. In addition, Reward forms require fewer fossil fuels to ship and produce renewable concrete structures that save trees.

Reward Helps Meet LEED Requirements

The U.S. Green Building Council's Leadership in Energy & Environmental Design (LEED) sets the nationwide standards outlined in the Green Building Rating System. Building with Reward Wall Systems ICFs can help you earn points toward LEED certification in four of the six categories of the rating system, including:

- **Energy & Atmosphere**
iForm provides superior air tightness, insulating value, and thermal massing.
- **Materials & Resources**
Reward ICFs incorporate recycled materials, use locally derived resources, and minimize construction waste.
- **Indoor Environmental Quality**
Reward ICFs reduce air infiltration and improve thermal comfort.
- **Innovation & Design Process**
Durability of iForm's concrete structure helps the product contribute to points under this category.

Reward Goes Beyond The Block

More Than Green

At Reward Wall Systems, Inc. we put your performance concerns at ease. We understand the “big picture” so you don’t have to. It is our goal to help you get the ICF building you think you’re going to get but probably won’t unless you work with a company that thinks more comprehensively about the role, function and interaction of ICFs with the mechanical, exterior, interior and building envelope systems.

Diverse Products

Our product development philosophy is customer-driven, market-driven – allowing us to stay one step ahead of the competition, emerging us as an industry leader. The wide variety of ICF block widths and configurations ensures there is a Reward ICF best suited for the job. Reward also offers innovative products such as the xLerator™, our “drop and go” reinforcement system in our ledge and taper top forms, and the tieKey™, the only ICF masonry anchor in the industry.

Design Support

- Meeting energy efficiency objectives
- Obtaining LEED certification
- Detailing ICF wall assemblies specific to your project

Technical Support

- Product ratings—all of which have been documented and verified by third-party agencies
- Building codes—the most comprehensive code approvals in the ICF industry.
- Accredited testing data and reports on all ICF performance issues
- Library of data, documentation, and prescriptive tables for engineering assistance

On-site Support

At Reward we don’t just sell you the forms and send you on your way. We are proud to have product application specialists available as an on-site training resource for the contractor and crew, assuring everyone is comfortable using Reward insulated concrete forms before and after the pour.

Only Reward

Delivers the most complete line of ICF building materials and construction building code approvals.

Offers the industry’s only “drop-and-go” ledge reinforcement system.

Features a truly pre-assembled, reversible ICF form.
