

# Reward Goes Beyond The Block

## *from* Reward

Available in a variety of widths and corner configurations – and includes a ledge form, taper top and T-form – with Reward iForm, it's never been easier to produce walls that are straight, square and plumb.

- **Universal** – No top or bottom, no right side or wrong end — even corners work as either left or right. Reuse cut pieces to eliminate waste.
- **Strong** – Horizontal and vertical center ties and enhanced corner ties provide unmatched strength during concrete pours.
- **Stackable** – beveled interior edges allow easy stacking, even with complex floor plans.
- **Easy** – Snap-in, loose-fit, two-deep rebar chairs let you place horizontal rebar in five different positions and eliminate rebar ties. Even accommodates two pieces of horizontal rebar or overlapping ends.
- **Finish** – Ties not only run the full length of the block for maximum strength, they are also recessed a full 1/2" for fast EIFS and other finishing.

# Value-Added Construction

There is a better way to build – and it begins with Reward Wall Systems. Our patented system for iForm insulating concrete form construction (ICF) is the most innovative and versatile on the market. So, you're able to produce cast-in-place, concrete-filled, steel-reinforced walls, while taking advantage of shorter construction times, smaller crews and in-field performance that's second to none. At the same time, Reward iForm delivers the long-term cost savings that customers want in such areas as:

## Lower Cost of Ownership

Reward-built structures reduce energy costs by 50% to 80% and require dramatically less maintenance.

## Greater Safety

The walls withstood a blast from 50 lbs. of TNT from a distance of 10 feet with no cracking. Reward ICFs also deliver up to four-hour fire ratings, stand up to 200 mph winds and ensure excellent performance in seismic zones – without the additional reinforcement required with traditional masonry.

## Unmatched Comfort

Create a superior airtight envelope to lock out mold, moisture and outside allergens – as well as outside noises.

## Environmentally Friendly

Earn points toward LEED certification for green building in such categories as – Energy and Atmosphere, Materials and Resources, Indoor Environmental Quality, Innovation and Design Process.

## Only Reward

Delivers the most complete line of ICF building materials– and construction building code approvals

• Offers a “drop-and-go” ledge reinforcement system

• Features a truly pre-assembled, reversible ICF form
